

CoreStation RX360

Compact Performance Workstation

Benefits and Features

Key Features

- Secure anywhere, anytime access to a performance workstation
- Compact design and short depth to minimize its data center footprint
- Affordability and performance with Intel Xeon E-2400 processors
- NVIDIA professional RTX GPUs
- Windows OS options
- Flexible support for multiple displays, with up to four 4K UHD

Remote Access

- Support for a variety of remote display protocols to deliver a true workstation experience from any location
- Remote connections can be local, across country or continent-to-continent
- Offload protocol compression to GPU hardware to free valuable resources
- Support for Amulet Hotkey thin clients and trusted zero clients, plus the option for a software client on any device

Management and Reliability

- Built on the Dell PowerEdge R-Series enterprise server platform
- Embedded hardware management with iDRAC9 Enterprise
- Range of management tools available including Dell OpenManage

Economic and efficient, accelerated workstation for secure access anywhere

Powerful, custom engineered 1U rack workstation with server-class management and monitoring

With Intel Xeon E series processors and NVIDIA RTX graphics cards, the Amulet Hotkey CoreStation RX360 delivers professional workstation performance, in an affordable and data center optimized form factor. RX360 can help you:

- protect sensitive data and valuable intellectual property;
- deliver mobility without compromising performance;
- boost productivity and team collaboration.

Data center optimized for scalability and reliability

The CoreStation RX360 is based on the Dell PowerEdge R360 server, enhanced by Amulet Hotkey to support NVIDIA GPUs and a Windows client OS, enabling it to be deployed as a dedicated workstation.

- Maximum efficiency: the RX360 delivers a professional grade processor and GPU in 1U rack space to minimize data center footprint.
- Easy integration: each workstation includes its own dedicated iDRAC for remote management, providing a platform that can be easily integrated into an existing data center.
- Increase uptime: redundant power and networking can deliver improved availability and ensure a longer lifespan.
- Enhanced management: deploy Dell OpenManage to automate and monitor your centralized workstation infrastructure.

Dedicated power and performance

Deliver many of the advantages of VDI by centralizing compute, but with dedicated resources to ensure maximum performance at all times.

- Processor flexibility: Intel Xeon E-2400 family with up to 8 cores
- Fast speeds: up to 3.5 GHz base and 5.6GHz boost clock speeds for single-threaded performance, supports DDR5 memory with speeds up to 4800 MT/s.
- Protocol acceleration: hardware acceleration of multiple protocols including HP Teradici Anyware, VMware Blast and Citrix Remote PC.
